

INTERNSHIP PROGRAM

ARCHITECTURE

Providing specialized learning opportunities to help students gain valuable skills and knowledge.

Are you looking to jump-start your career with real-world experience? At Cushing Terrell, we offer an internship program with tremendous opportunities to further your understanding of the architecture, engineering, and design industry. The program will immerse you in day-to-day work, learning alongside design professionals and working on real projects. Experience the full integration and coordination of a multidisciplinary design firm and be mentored by team members who are passionate about delivering imaginative, responsible, first-of-their-kind environments.

The intern experience at Cushing Terrell gives you a unique opportunity to learn not only about yourself but what it means to be in the AEC industry. Whether it's hands-on experience with 3D printing, 3D modeling, visiting construction sites, or putting together presentations, you'll get to experience it all, but at a whole new level.

Jordan Payne
Architectural Intern

What to Expect as an Architecture Intern

- A fun and creative work environment
- Real-world architecture project experience
- Mentorship to guide you as you tackle day-to-day challenges
- Work alongside and learn from professionals in a variety of disciplines

The Cushing Terrell Experience

When it comes to architectural design, our team understands that each client is unique with varying needs, expectations, challenges, and dreams for their projects. And each site is different — the environment, orientation, and surrounding communities. Thus, our design process is driven by the needs of the people who will utilize the space and the site itself. Our architectural team members take time to understand both, serving as guides to help clients realize the ideal form and function for their spaces. We believe successful design meets people where they are, and that architecture should be personal.

By integrating architecture, engineering, urban planning, landscape architecture, interior design, and more, we approach the design of the built environment with a holistic mindset and a goal of contributing to sustainable systems and spaces that help people live their best lives. Our broad range of specialized service offerings, project locations, and a love for exploration, research, and discovery make each day an adventure.
