

INTERNSHIP PROGRAM

REFRIGERATION ENGINEERING

Providing specialized learning opportunities to help students gain valuable skills and knowledge.

Are you looking to jump-start your career with real-world experience? At Cushing Terrell, we offer an internship program with tremendous opportunities to further your understanding of the architecture, engineering, and design industry. The program will immerse you in day-to-day work, learning alongside design professionals and working on real projects. Experience the full integration and coordination of a multidisciplinary design firm and be mentored by team members who are passionate about delivering imaginative, responsible, first-of-their-kind environments.

My favorite part about Cushing Terrell is the people. Everyone is incredibly passionate about what they do, and the Refrigeration Team really cares about our continued education outside of the classroom. We started with a training program that had a little bit of everything concerning client-focused design. Now I'm supporting engineers in the design process, and they make it so easy to ask questions.

Katelyn Anderson
Refrigeration Intern

What to Expect as a Refrigeration Engineering Intern

- A fun and creative work environment
- Real-world project experience
- Mentorship to guide you as you tackle day-to-day challenges
- The opportunity to work alongside and learn from professionals in a variety of disciplines
- Work alongside and learn from professionals in a variety of disciplines
- Develop a base foundation of engineering principles and code requirements that build on your college experience
- Opportunities to interact with interns across the company
- Work with engineering teams on active projects and assignments
- Site visits with project leads (dependent on project phase and time of year)
- Weekly specialized learning courses:
 - Refrigeration basic concepts and understanding
 - Cooling loads and equipment specifications
 - AutoCAD and Revit drafting systems
 - Multi-discipline coordination
 - Product selection software
- Gain exposure to the variety of project types we complete at Cushing Terrell with access to the teams who complete them
- Introduction to the business side of the engineering industry
- A memorable experience that will equip you with tools for setting and reaching your career goals

The Cushing Terrell Experience

At Cushing Terrell, we design efficient, sustainable refrigeration systems tailored to meet our clients' needs. Our goal is to understand their operational requirements and provide cost-effective solutions that are designed with the latest technologies. With a portfolio of 4,000-plus commercial refrigeration projects, some of our most groundbreaking work has included design of the first Ammonia/CO₂ Cascade System in a grocery store in the United States, as well as hundreds of projects that have earned EPA GreenChill ratings.

By integrating architecture, engineering, urban planning, landscape architecture, interior design, and more, we approach the design of the built environment with a holistic mindset and a goal of contributing to sustainable systems and spaces that help people live their best lives. Our broad range of specialized service offerings, global project locations, and a love for exploration, research, and discovery make each day a unique adventure.
