

INTERNSHIP PROGRAM

STRUCTURAL ENGINEERING

Providing specialized learning opportunities to help students gain valuable skills and knowledge.

Are you looking to jump-start your career with real-world experience? At Cushing Terrell, we offer an internship program with tremendous opportunities to further your understanding of the architecture, engineering, and design industry. The program will immerse you in day-to-day work, learning alongside design professionals and working on real projects. Experience the full integration and coordination of a multidisciplinary design firm and be mentored by team members who are passionate about delivering imaginative, responsible, first-of-their-kind environments.

During my internship at Cushing Terrell, I've enjoyed contributing to real-world structural projects while deepening my understanding of topics such as lateral systems and load paths through weekly learning sessions.

Allison Jansen
Structural Engineering Intern

What to Expect as a Structural Engineering Intern

- A fun and creative work environment
- Real-world structural project experience
- Mentorship to guide you as you tackle day-to-day challenges
- Work alongside and learn from professionals in a variety of disciplines
- Develop a base foundation of engineering principles and code requirements that build on your college experience
- Opportunities to interact with interns across the company
- Work with engineering teams on active projects and assignments
- Develop calculations, plans, and details for an example building
- Site visits with project leads (dependent on project phase and time of year)
- Complete twelve weekly modules taught by structural engineers throughout the company
- Gain exposure to the variety of project types we complete at Cushing Terrell with access to the teams who complete them
- Introduction to the business side of the architecture/engineering industry
- A memorable experience that will equip you with tools for setting and reaching your career goals

The Cushing Terrell Experience

Our structural engineering group provides clients with an array of services — from bridge design, seismic expertise, historic retrofits, and mass timber utilization to material handling and racking, and tilt-up concrete projects. With in-depth knowledge and experience, our team has an outsized impact on the success of all building types, including education, commercial, government, healthcare, industrial, infrastructure, residential, and retail. We not only ensure the structural integrity of each project but also support clients with expert advice and flexible solutions that stand the test of time.

By integrating architecture, engineering, urban planning, landscape architecture, interior design, and more, we approach the design of the built environment with a holistic mindset and a goal of contributing to sustainable systems and spaces that help people live their best lives. Our broad range of specialized service offerings, project locations, and a love for exploration, research, and discovery make each day an adventure.

I am really impressed with the structure of the internship program. Cushing Terrell puts a heavy emphasis on making sure interns learn how to design a building and its components by the end of the work period.

Maxwell Dube
